

PROFESSIONAL PRACTICES ABROAD

We offer international professional internships in local companies and organizations to enhance the understanding of other cultures and exchange work methodologies and good practices.

In addition, the students will complement the theoretical training by implementing their knowledge into practice in real case scenarios. The international professional internships are aimed at people who are about to graduate or have recently graduated. They will have the possibility of validating this experience with their formal studies.

Lea Global has been working in Global Education for 20 years.

Our goal is to train the next generation of leaders through a Global Campus that gives them the experience and knowledge necessary to work in diverse and complex environments.

We design educational programs together with universities and our local partners, who also offer logistical services in the field.

**GLOBAL
YOUTH
ACADEMY**

You will learn and train yourselves with the Global Youth Academy, an e-learning platform on the participation in global challenges. As a result, you will learn to launch your own projects with a social impact.

Through your voluntary action you will contribute to the implementation of the United Nations 2030 agenda by improving projects with local NGOs.
